¹There are no direct fuel costs for hydroelectric, geothermal, wind, photovoltaic or solar thermal energy.

²There is a discontinuity in this time series between 1989 and 1990 due to the expanded coverage of non-electric utility use of biofuels beginning in 1990.

³Includes ethane, ethylene, butane, butylene, butane-propane mixture, ethane-propane mixture, and isobutane.

⁴Includes asphalt and road oil, aviation gasoline, kerosene, lubricants, petroleum coke (industrial and used at electric utilities).

NC-No consumption, including cases where adjustments were made.
